1-Day / March 10, 2010

Residential Sprinklers: Homes to High-Rise

Seminar Topics:

- Review of the Residential Fire Problem
- Fire Sprinklers and Related Components
- Fast Response Technology
- Residential Sprinklers
- Residential Design in the NFPA Standards
- Evaluating Water Supplies
- Hydraulic Calculations, Four Sprinkler Designs

Each attendee will receive a workbook with exercises to reinforce the subjects covered. The attendee should come to class prepared to participate and bring the following:

- copy of NFPA13, 13R & 13D (current editions)
- note paper and pen

- Registration includes workbook
- Registration Begins: 7:30 AM
- Seminar: 8:00 AM TO 5:00 PM
- Class size limited to the first 50 registrants.
- Completion Certificates will be presented to attendees.

Who Should Attend?

This one-day seminar is intended to provide basic information on fire sprinkler systems in residential environments.

It is most beneficial to contractors, designers, architects, engineers, plan reviewers and insurance authorities.

Code enforcement officials will also find it a tremendous asset in the performance of their job.

••• **“After attending this class my confidence level in the performance of the job has just been enhanced ten-fold... Thanks!!!**

••• **“Our instructor was incredible. He kept us interested and explained everything completely.”**

••• **“Very good seminar. I especially appreciated the break-down of complicated systems.”**

••• **“I’ve taught alot over the years. John Corso is good at teaching; very good. He made a dry confusing subject fun and interesting. He taught me how to teach even better... Thanks!”**

••• **“Best fire sprinkler class ever. Lots of humor backed up by substantial learning... Thanks!”**

••• **“Very good class. Information will be helpful for career development.”**

1-Day / March 11, 2010
